**Wall Mounts** - Use wall mounts to fasten the rails of the fence to a column, post or wall. Wall mounts are small aluminum castings which go over the end of a rail and have holes to attach them to a flat surface. There are two types of wall mounts. Fixed Wall Mounts attach straight onto the column; Adjustable Wall Mounts allow you to mount your fence section up to a 45° angle. Wall mounts can also be used on posts when you need to follow an unusual angle or if you are stepping the fence sections rather than racking them. Please Note: **We DO NOT supply mounting screws or anchors with our wall mounts.** There are too many types of materials in which to fasten. Therefore, you will need to purchase screws and/or anchors at your local home improvement store. Each Wall Mount has pre-drilled, 7/32" diameter holes for mounting.
